

PROBLEM STATEMENT #56 | Media, Events & Community

Peer Skill Exchange & Mentorship Network

1. Problem Context & Overview

A time-banking skill exchange platform where community members trade skills (e.g., 1 hour of Python tutoring for 1 hour of Guitar lessons) with mutual feedback rating validations.

Target Stakeholders / Actors: *Learner Member, Skill Mentor*

2. Sample Functional Requirement (FR) Guideline

Sample Requirement: FR-001 [Priority: High]

Description: The system shall maintain a time-credit balance for each member, crediting 1 hour upon verified completion of a teaching session.

Sample Acceptance Criteria: Pass: Time credit transfers from learner to mentor after session sign-off; Fail: Member with 0 credits books session.

3. Sample Non-Functional Requirement (NFR) Guideline

Sample Requirement: NFR-001 [Type: Performance & Security]

Description: The session scheduling calendar must sync seamlessly with Google Calendar and Outlook via iCal export feeds.

Sample Acceptance Criteria: Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.

Deliverables to Submit: [All through a GitHub Repo in your account]

- **Complete Requirements Table:**

- >> Exactly 5 Functional Requirements (FR-001 to FR-005)
- >> 2 Non-Functional Requirements (NFR-001 & NFR-002) with ID, Type, Description, Priority, Acceptance Criteria, and Rationale.

- **UML Use-Case Diagram:**

- >> Model all actors, primary use cases, and include at least one «include» and one «extend» relationship.

- **Use-Case Flow Specification:**

- >> 1-page document for one core use case detailing Preconditions, Postconditions, Main Success Scenario
- >> One Alternate Flow.
